

# <u>Annual Dinner, Saturday Feb 19<sup>th</sup>, 7:00pm</u> Ticket Sales/Cocktails at 6 pm – West Plainfield Fire Station

The Fly Fishers of Davis' Annual Dinner is coming up on Saturday, February 19<sup>th</sup>. We'll serve dinner at **7 p.m.**, but the doors will open at **6 p.m.** for raffle ticket sales, cocktails, and general hobnobbery. This year we return to Lillard Hall (West Plainfield Fire Station) located at 24905 County Road 95, near Davis. (Between CR's 29 & 30—

see map below). Hickory Hank will be the chef preparing his usual hearty fare for our dining pleasure. The no host bar will be located in the same corner of the room as in the last several years. We are streamlining our raffle ticket sales

so it shouldn't take long to buy your giant bundle of tickets. You can still

buy dinner tickets at the door (\$30 adults, \$15 children).

We'll have the usual General Raffle, a multitude of Bucket Items as well as several Silent Auctions, Live auction, and a high-roller raffle. The "high roller" raffle ticket is given for every \$100 in raffle tickets bought. Steve Ohrwall will be the Master of Ceremonies for the raffle and auction and promises to make the evening exciting.

Paul Berliner has produced a new video program again this year, and if you recall from last year it was one of the highlights of the dinner.

Again, make sure you mark this date on your calendar and please attend as this is FFD's only fundraiser during the year and the major source of club income to pay for speakers, conservation efforts, and the classroom aquarium education program.

If you have items to donate to the raffle, please bring them to the dinner. It would help to notify Gene Gantt about it, but

bring it anyway.

#### The Prez Sez

#### **By President**

I would like to take this opportunity to thank you for allowing me to serve as president for the last two years. My term has been fun and rewarding but I have served my time and now I get to go. I'm passing the gavel to Gene Gantt at the annual dinner so don't forget to be there.

The Annual Dinner is Saturday February 19th and will be at Lillard Hall (same as last year). The doors open at 5:00 p.m. If you have not pre-purchased your tickets you can do so at the door. Also, for those of you have not yet paid your 2011 FFD dues you can do that at the same time. John Reynolds will be happy to see you.

We are expecting a great turnout and I'm sure the food will be great as always. We have an outstanding assortment of raffle prizes that Steve Ohrwall will graciously distribute. Paul Berliner has produced another; I am sure, award winning show for us.

You will find more information and maps elsewhere in this newsletter.

This is our big fund raiser for the year so bring plenty of \$\$\$\$. See you at the dinner.

#### **California Duck Days 2011**

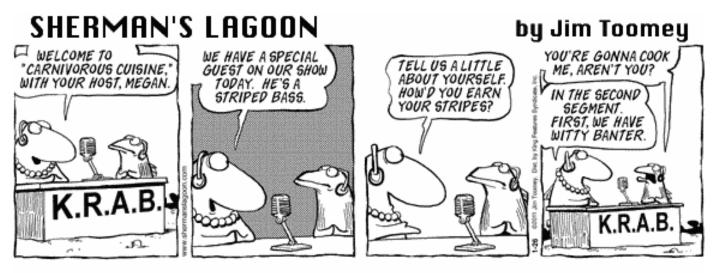

## Yolo Bypass Wildlife Area, 45211 Road 32B, Davis, CA.

California Duck Days, a wetlands festival in the heart of the Pacific Flyway, will be held on **February 25<sup>th</sup>** and **February 26<sup>th</sup>**. A gala reception and Wildlife Art Show will launch the festivities on Friday evening February 25<sup>th</sup> at the **Davis Arts Center**, from 5:30 to 7:30pm. This event is free to the public.

On Saturday February 26<sup>th</sup> the festival will feature one full day of field trips, workshops and other activities at the Yolo Wildlife Area Headquarters facility in South Davis. The Flyfishers of Davis are going to be part of this event this year. If you can help, please contact Gene Gantt at 707-590-3446 or by email fishinggantt@comcast.net.

For more information on this event: www.yolobasin.org.

#### **Meeting Schedule**

I hope you all got a chance to fish during September. Be sure to send pictures of your trips for future newsletters! There are a couple of outings, so be sure to see the Outings Update elsewhere in this newsletter. Be sure to note that the Striperfest has moved to November 13.

The meeting schedule has been tentatively set through next July, with the speakers named through February. Note that all our meetings except the one on December 14 will be at Holmes Jr. High School. Holmes is not available for our December date, so the Home Grown Meeting will be at Harper Junior High School. Be sure to thank the program chair, Donn Erickson, the next time you see him for continuing to find high quality program speakers.

Fly Fishers of Davis 2010-2011 Meeting Schedule						
MONTH	<b>SPEAKER</b>	DATE	TOPIC			
January 2011	Dennis Lee	Jan 25 <sup>th</sup>	American River Steelhead			
February 2011*	Annual Dinner	Feb 19 <sup>th</sup>	Location: West Plainfield Fire Station			
March 2011	Jay Murokoshi	Mar 29 <sup>th</sup>	Baja fishing			
April 2011	John Gantner	Apr 26 <sup>th</sup>	Lake Shasta bass			
May 2011	Phil Rowley	May 24 <sup>th</sup>	Stillwater fishing			
June 2011*	Annual Picnic	June 28 <sup>th</sup>				
July 2011	Mark Rockwell	Jul 26 <sup>th</sup>	Klamath Basin Settlement			
August 2011	No Meeting		Go Fishing			
September 2011	Lance Gray	Sept 27 <sup>th</sup>	Feather River			
October 2011	Lincoln Gray	Oct 25 <sup>th</sup>	Floating the Lower Sac			
November 2011	John Sherman	Nov 29 <sup>th</sup>	The Delta			
December 2011	Club members	Dec 13 <sup>th</sup>	Home Grown Meeting			

\*Except where noted, all meetings will now take place at Holmes Jr. High School

## **Classroom Aquarium Education Project**

Leslie A.Whiteford, the Science Teacher at Robert E. Willett Elementary School sent these writing samples from her 6<sup>th</sup> grade class. Here's a student paragraph about the plight of the salmon in California:

Salmon are now a threatened species because of humans. We have poisoned them with pesticides, fertilizers, and even industrial waste. We have also stopped them from breeding by overfishing them, and creating man made obstacles. We have created huge dams. Some farmers let their cows or other animals graze along the river banks, killing the vegetation. Our logging and mining leads erosion, causing muddy waters. Even the people reading this paragraph could be hurting salmon. You could hurt them by flushing chemicals down your toilets, or draining bad water down your sink. One simple way to help salmon is to pick up garbage wherever you see it: flying on the wind, floating in a river, or lying on the ground. Pick it up! We need to watch how much pollution we create or else we might destroy the whole salmon population. If we can't save the salmon, can we save ourselves?

Here are a couple of poems:

Cold water is their habitat Herbicides, pesticides, and fertilizers are threats Incredible miles they travel No dams provide an entrance for spawning Overseas they travel Once in shallow area, female digs a redd Killed by difference in water

Skin changes color when traveling The Salmon Run Agriculture uses 75% of California's water Less than an inch long when born Males fertilize eggs with milt Over 100 dams in California Now's the time to save them!

#### Life of a Salmon

Torn from their parents They are born Then as alevin Very forlorn

They are fry To eat and sometimes die For there are dangers Along the way

Living in estuaries They smolt To go to the salt Of the sea

They stay in the ocean For years and years Only to go back home To face their fears

Blame the humans For what we do We are killing the salmon And eating them too

Along the way They turn bright colors To light Another's day

Hope these writing pieces encourage you to continue the important work you do on behalf of salmon, and all species that depend on our waterways. Thanks again for all your support in the classroom.

Sincerely, Leslie

## FROM the CONSERVATION DESK

#### By Lowell Ashbaugh

<u>Conservation Mailing List</u> Want to keep up on conservation issues between newsletters? Join the FFD Conservation email list at http://www2.dcn.org/mailman/listinfo/ffd-conservation.

**<u>Restore the Delta Benefit</u>** Restore the Delta, a local broad-based coalition including Delta farmers, environmentalists, fishermen, business leaders, and concerned citizens, will be introducing its new board members to the Delta communities at its **Art**, **Wine and Edible Delight Benefit on February 26, 2011. The event will be held at the Old Sugar Mill in Clarksburg, California from 6 to 9 pm. Tickets can be purchased on-line at** <u>www.restorethedelta.org</u>.

Over the last four years Restore the Delta has grown from a Stockton-centered organization of 75 members to a widely recognized regional and state organization of over 7000 members, who recognize that the Sacramento-San Joaquin Delta is a natural treasure.

Restore the Delta's new Board President Joy Baker is part of a sixth-generation Delta pear farm family located in Courtland. Ms. Baker believes that the strength of the newly organized Restore the Delta organization is the diversity of its board. Baker says, "Our 18-member board includes representatives from four of the five Delta counties, in addition to the East Bay. Our group includes farmers from the North Delta to the South Delta, representatives from the A.G. Spanos Corporation and Food 4 Less, fishermen, renowned environmentalists like Bill Jennings, lawyers, accountants, and others with a deep understanding of what is at stake for the Delta's future."

The event, sponsored by Carvalho Family Winery, will feature the artwork of Delta photographer Mike Pieretti. Pieretti, a North Delta residents has had his work exhibited throughout the Delta, most recently at the Old Sugar Mill in Clarksburg. The Stockton-based musical trio, Mom's Chili Boys, will be the evening's featured musical artists.

Wine tasting, a silent auction, and a raffle will all be part of the evening's festivities.

Action Alert from Restore the Delta Last Friday, the U.S. House of Representative passed the 2011 Continuing Resolution, a must pass spending bill, to keep the Federal Government funded. Language included in this base bill, however, would defund the implementation of biological decisions made for reduced Delta pumping, thereby allowing record level of water exports from the Delta to resume.

While some House Representatives, like Congressman Devin Nunes (CA - 21<sup>st</sup> District), are calling it a water restoration measure, this backdoor attempt to thwart the implementation of sound Delta management principles, would bring the final death blow to several Delta fisheries which are on life support presently.

The Continuing Resolution, however, must now go to the Senate and pass through the Senate before March 4, 2011. Please call Senator Feinstein and ask her to strip this Delta killing provision from the 2011 Continuing Resolution.

Remind her that the California and Oregon salmon fishing industry is tied to the health of the Sacramento-San Joaquin Delta. Please also tell her that the Delta farming community, a multi-billion dollar annual economy, is also tied to Delta water quality. We cannot fix the water challenges in Central Valley communities by destroying working Delta farms and California's fishing communities. Available State and Federal funding resources must be used to create water selfsufficiency in each region of California and to reduce dependence on Delta water exports.

Senator Feinstein's office numbers are as follows: (202) 224-3841, Washington D.C.; (415) 393-0707, San Francisco; Los Angeles (310) 914-7300; (619) 231-9712 San Diego; and 559-485-7430, Fresno.

<u>Peter Moyle Article</u> There's a great article on the idea of controlling Striped Bass (e.g. no limit on take) to reduce predation on other fish (salmon, in particular) on the California Water Blog at

http://californiawaterblog.com/2011/01/31/striped-basscontrol-the-cure-worse-than-the-disease/. Dr. Moyle outlines a number of assumptions that would have to be true for Striped Bass control to work, including

- Striped bass predation is the major regulator of salmon and other threatened species
- Other predators would not increase their predation rates if Striped Bass populations were reduced

- Other species that Striped Bass prey on would not increase their populations and cause further harm, and
- Reducing the Striped Bass population would measurably compensate for harm to the estuary caused by other impacts such as water diversions and loss of habitat.

Dr. Moyle goes on to show why each of these assumptions is unlikely to be true, and he concludes that the key to restoring desirable species in the Delta is to return it to a more variable estuarine environment. He also concludes that reducing Striped Bass numbers is more likely to have a negative than a positive effect on the species such a program would be designed to protect. I highly recommend reading the post.

**U.S. EPA Launches Investigation into Toxins and Stressors Impacting Fish in the Bay Delta** The U.S. Environmental Protection Agency will take action on an Advanced Notice of Proposed Rulemaking (ANPR) seeking public input on the effectiveness of current water quality programs influencing the health of the San Francisco Bay Delta Estuary. The ANPR identifies pivotal water quality issues affecting Bay Delta fisheries, describes regulatory measures currently underway, and initiates an information-gathering process on how the EPA and the State of California can achieve water quality and aquatic resource protection goals in one of the West Coast's most ecologically diverse and important aquatic habitats.

This ANPR is part of a comprehensive set of commitments made by the Obama Administration to address California water issues under the Interim Federal Action Plan released in December 2009.

In its ANPR, EPA notes that it will be coordinating its review of water quality issues with the on-going development of the Bay Delta Conservation Plan, which currently is being developed through a collaboration of federal, state and local agencies, environmental organizations, and other interested parties.

Deputy Secretary of the Interior, David J. Hayes, who has been helping to lead the BDCP effort for the federal agencies, welcomed EPA's action, noting that "EPA's attention to a variety of water quality stressors and the role they play is an important complement to the science-based analysis that is going into the Bay Delta Conservation Plan effort." The ANPR will be published to the Federal Register within one week. EPA encourages interested parties to read the ANPR and provide additional information and suggestions for actions to improve Bay Delta Estuary water quality and aquatic resource protection. Comments can be submitted electronically at the Federal Rulemaking Portal (www.regulations.gov) identified by docket EPA-R09-OW-210-0976 or in hardcopy addressed to Erin Foresman, US Environmental Protection Agency, 75 Hawthorne Street, San Francisco, CA 94105.

#### News from NCCFFF

Action Alert from NCCFFF Secretary Laird of the Resources Agency quickly stepped forward over the weekend to address the House Continuing Resolution (see above), and the anti--ESA language it contains. In particular he communicated to Senator Feinstein the negative impacts it can have on a multitude of California issues - Bay-Delta negotiations, San Joaquin River restoration, etc. A call to her office, 1-202 224-3841, in support of Secretary Laird would help. If you can, give her a call. They need to hear from us all over the state. Issues of concern are:

- Congress should make decisions based on science to protect listed species under the Endangered Species Act.
- Congress should not interfere with state agency efforts to solve the California water and Bay-Delta issues.
- Congress would be overriding legal agreements on the San Joaquin River restoration with this CR
- Congressional meddling promotes future lawsuits

#### Book of the Month By Jim Luschwitz

#### "Barr Flies How to Tie and Fish the Copper John, the Barr Emerger and Dozens of Other Patterns, Variations, and Rigs. The Copper John and Beyond" By John Barr

The first twenty chapters of Barr Flies focus on a single pattern for each chapter, with a number of pattern

variations at the end of each chapter. All combined, this makes for more than six dozen fly patterns with very detailed tying instructions. The author adds value by providing tying tips while describing the complex tying steps. Fly patterns include Barr's most successful flies, including the Copper John and its variations, Barr Emerger, Caddis Larva, Graphic Caddis, Vis A Dun, Web Wing Caddis, B/C Hopper, and others.In addition to the tying instructions, he provides the background on how he developed these patterns. Many tiers will find the evolution of his well known patterns fascinating. You'll also find tips on fishing Barr's flies. The final chapter provides instructions for fishing multiple fly rigs to maximize

fish-catching potential. He treats subjects such as combinations of duns, emergers, hoppers, streamers and

> other flies in combinations with the same enthusiasm and careful teachings as he does his fly tying. Barr's approach to fly combinations, such as his instructions and tips for fishing a three-fly rig, enlightens anglers with the techniques he uses to hook more fish.

#### The Bottom Line

If you want to be well-armed while on the trout stream, look at John's fly boxes at the end of the book. The photographs and notes on his hatch box, nymph box, and other well stocked fly boxes provide a good model for any angler who wants to catch trout. This book is outstanding; it leaves me wanting more of Barr's patterns and further notes on his approach to fly design.

#### How to become a member of the Fly Fishers of Davis

Dues for adults and families are 25/year. Student rate is 15/year. The monthly newsletter is distributed by e-mail only. Please be sure to provide a valid e-mail address so that we can get the newsletter to you in Adobe Acrobat format. You can bring the application to the club meetings, which are held at 7:30 p.m. on the last Tuesday of the month. For more information, contact: John Reynolds , 530-753-2682 or mailto:jreyn@dcn.org – Membership Chair

Doing a brisk business at the bar

#### ----- Outings Report ------

With no regular meeting this month and no outings not already covered, this edition's column will focus on the trips upcoming before the March meeting. The Club was able to fill the usual void of February with two outings. The first is a shot at the Fly Shop's Luk Lake in Corning. Reports indicate the potential of trout to double digits and bass averaging 3-4 pounds. If this works out, it may become a regular repeat. The second February venture is another of the hopefully very successful Yuba forays. Obviously at this time of years flows pose a potential issue, but hopefully we will be between storms and have reasonable water levels.

The first weekend in March is the now annual Baum trip. Jim Wright reports significant recent stocking which bodes well for another good session. Baum can be very technical and does require some sort of floating apparatus. Several weeks later are the Friday and Saturday March Fly Shop trips in the Redding area. These trips generally are quite successful as to numbers and sometimes size also. Interestingly, this time there are more boats on Friday than Saturday for the first time.

At the March meeting there will be signups for a few new trips starting in August and running into the Fall. In this regard and as a note for those planning on going to Davis in June: the campgrounds near the ramp are closed. Depending on numbers we may try to reserve the Grizzly Store facility, but this is a long shot. There may also be camping in the overflow area above the Honker ramp which will not be as pleasant as were the campgrounds. Hopefully we will find a place to all be together but that may not work out.

If you have any ideas you wish to put forward and organize into Club outings please contact any Club Board member or Cary Boyden at <u>ccb819@sbcglobal.net</u>. Anyone interested please contact me at <u>mailto:ccb819@sbcglobal.net</u> - <u>Cary Boyden</u>.

## Copyright 2010 All Rights Reserved. The Fisherman's Line is published by: The Fly Fishers of Davis

P. O. Box 525

Davis, California, 95617

The Fly Fishers of Davis (FFD) is a non-Profit 501.C.4 charitable organization dedicated to the education, participation, conservation and enhancement of fly fishing. Annual associate membership is \$25 beginning with each calendar year. FFD meets monthly except for the months of July & August. Regular monthly meetings are held the last Tuesday of each month except for December and February. December meetings are held the second Tuesday to accommodate holiday schedules. February hosts the Annual Dinner meeting which is scheduled in the latter part of the month based upon facility arrangements.

FFD is an affiliate club of the Federation of Fly Fishers (FFF), an international nonprofit organization, and its Northern California Council (NCCFFF) affiliate.

Meetings and membership are opened to the public.

The Fly Fishers of Davis provide equal opportunity membership without discrimination on sex, race, origin, age or religious orientation.

E-Newsletter Policy

Our policy is to deliver the e-newsletter via email OR you may download it from the FFD website at: <u>http://www.dcn.davis.ca.us/go/ffd/</u>.
