

The Fisherman's Line

Annual Dinner, Saturday Feb 18th, 7:00pm

Ticket Sales/Cocktails at 6 pm – West Plainfield Fire Station

Davis (between County Roads 29 & 30—see map below). Hickory Hank will be the chef preparing his usual hearty fare for our dining pleasure, and this year we'll have a vegetarian option! The no host bar will be located in the same corner of the room as in the last several years. We are streamlining our raffle ticket sales so it shouldn't take long to buy your giant bundle of tickets – hint: plan to buy 100 and enter the High Roller

raffle! You can still buy dinner tickets at the door (\$30 adults, \$15 children).

We'll have the usual General Raffle and a multitude of Bucket Items, as well as several Silent Auctions, Live auction, and a high-roller raffle. The "high roller" raffle ticket is given for every \$100 in raffle tickets bought. Steve Ohrwall will be the Master of Ceremonies for the raffle and auction and promises to make the evening exciting. This is our fundraiser for the year – come out and support your club and all that it does for fishing, education, and conservation!

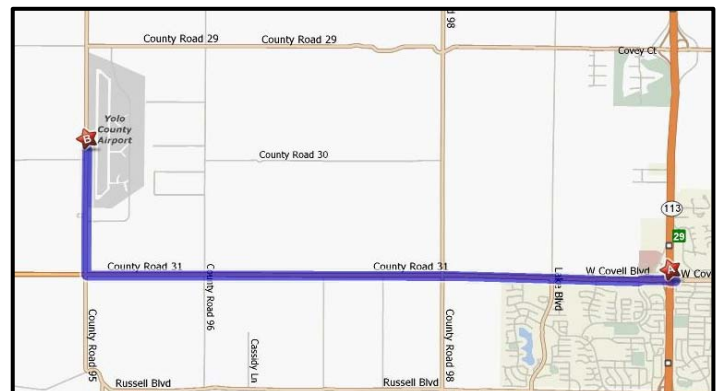

Paul Berliner has produced a new video program again this year, and if you recall from last year it was one of the highlights of the dinner.

Again, make sure you mark this date on your calendar and please attend as this is FFD's only fundraiser during the year and the major

source of club income to pay for speakers, conservation efforts, and the classroom aquarium education program.

If you have items to donate to the raffle, please bring them to the dinner. It would help to notify Gene Gantt about it, but bring it anyway.

The Fly Fishers of Davis' Annual Dinner is coming up on Saturday, February 18th. We'll serve dinner at 7 p.m., but the doors will open at 6 p.m. for raffle ticket sales, cocktails, and general hobnobbery. This year we return to Lillard Hall (West Plainfield Fire Station) located at 24905 County Road 95, near

Annual Dinner Tickets

Friends,

There will be tickets available at the door for the annual dinner (\$30 each). Remember that when you purchase your dinner ticket(s) you can also purchase raffle tickets. We have pre-stamped tickets in quantities of 50 and a **MINIMUM** purchase of \$50 worth of raffle tickets would send the 'stamper' into ecstasy. Our Homeland Security contacts have assured us that all club members can easily afford 50 raffle tickets, and that many (you know who you are) can readily afford **MANY** more. Don't forget the High Roller raffle for purchasers of 100 tickets.

Pontoon boat?

Another Mike Parker trip?

The Prez Sez

By Gene Gantt

Remember this month is our spectacular annual dinner. The date is Feb 18th, which is this upcoming Saturday. If you have not been contacted by a club member about an RSVP and numbers attending, please contact John Reynolds. His email is on this newsletter. It really helps to know how many to expect. Thanks!

We had a major victory this month on proposed regulatory changes which would have allowed more take and keep on Delta striped bass. This was a ploy by some central water districts to put blame on stripers as the cause of Coho Salmon decline. It amazes me how it took over 100 years after the introduction of striped bass into the Bay Delta ecosystem, but within just the last five years there were major water flows issues. More pumping of Delta water south along with more fish kills at the pumps is what it took for the striped bass to figure out how good salmon tasted. Makes me wonder how stupid some folks think we are??

See you at the dinner. Good food, great raffle items, super silent and live auction items. Take a look at what you may win and that is only if you buy lots of tickets. Good fun, so be sure to come and support your FFD.

See you at the dinner and get a line wet!

Meeting Schedule

The meeting schedule has been set for the rest of this year. Note that all our meetings will be at Holmes Jr. High School. Be sure to thank the program chair, Donn Erickson, the next time you see him for continuing to find high quality program speakers.

Fly Fishers of Davis 2011-12 Meeting Schedule			
MONTH	SPEAKER	DATE	TOPIC
February	Annual Dinner	February 18	Food, Fun, Raffle!
March	Charlie Bisharat	March 27	Topwater Fishing for Stripers on the Delta
April	Michael Leach	April 24	Fishing Yellowstone
May	John Squires	May 22	Do-it-yourself Alaska
June	Annual Picnic	June 26	Food, Fun, Addled Angler Award
July	Craig Nielsen		McCloud
August	No meeting		
September	Bill Forward	September 25	Lake Davis
October	Steve Cooper	October 30	Owyhee River OR
November	Chris O'Donnell	November 27	Western OR
December	Home Grown	December 11	

*Except where noted, all meetings will take place at Holmes Jr. High School

Get Ready for the Annual Dinner's Auction and Raffle!

The Annual Dinner is the club's largest fundraising event of the year. We use the funds to bring you exciting speakers at our meetings, to run the education programs such as "Steelhead Classroom," and to support conservation efforts to maintain our fisheries.

The raffle and auction supports the club all year long, so we encourage you to bring money for tickets – you can only win if you enter! This year, we've obtained some very high quality items, an amazing amount of the usual raffle prizes, and some excellent silent and live auction items. The special "High Roller" raffle and the "Fly Tyers" raffle table will also return this year.

How It Works!

As a reminder of how the raffle works, please buy your tickets at the dinner for \$1 apiece — the more you buy, the better your chances of winning! Your dinner ticket has a number on it, and all your tickets will be stamped with the same number. To win, simply remember your number! Oh, and we've already prestamped 50 raffle tickets for each dinner ticket to make it easy for you! And we're ready to stamp more for all you High Rollers!

High Roller Specials!

For every \$100 in raffle tickets that you purchase, you'll receive one "High Roller" ticket that's good for that raffle only. Once you put your High Roller ticket in the High Roller bucket, you have a chance to win two High Roller prizes:

- An Orvis Helios 6 wt. rod
- A Fly Shop trip on the Lower Sacramento River

Regular Raffle Tickets!

You have several options to use your regular raffle tickets. You'll see a number of "bucket items" around the room — goodies like waders, rods, reels, books, gadgets and so much more. Each item has a labeled bucket next to it. For a chance to win that item, put your tickets in the bucket. On the special "Fly Tying" table, same deal — for a chance to win, put your tickets in the bucket! For the huge general raffle, same deal!

Silent Auction!

This year, we'll also hold a silent auction and a live auction. Get together with your friends and be prepared to bid on the following trips and prizes:

- Guided trip on the Owyhee River for 2 persons (Steve Cooper): Live auction, minimum bid \$610 (3rd person \$75 extra).
- Top-water striper or black bass in the Delta (Charlie Bisharat): silent auction, minimum bid \$80.
- Klamath steelhead guided trip, includes all terminal tackle + lunch (Craig Nielsen, Shasta Trout): silent auction.
- Orvis 10' 4 wt. and Mirage LA II Reel complete outfit: This amazing live auction bidding starts at \$400.00.

And There's More!

This year's raffle is bigger and better than ever. Other raffle prizes include:

- Redington Crosswater 9' 5 wt. 2 piece rod
- Fly picture and frame
- Pontoon boat discount
- Redington Rise 5/6 reel
- iPhone cover – brown trout motif
- Numerous boxes of flies
- Louis Cairo gift certificate
- Sorenson's Resort lodging for two
- Patagonia chest pack
- Rocknassium gift certificate
- Hibbert Lumber Swiss Army knife
- Stillwater Presentations (book)
- Bishop Birds Whiskey Glass Set
- Lots of clothing – gloves, hats, and more

But Wait...
**THERE'S
MORE!**

Get Ready!

We'll see you Saturday evening, and please remember — you have our permission to raid the cookie jar! Please bring money for tickets, and know that your generous donations help the club all year long. You can only win if you enter!

Pay to Play By Cary Boyden

Two matters of moment as to Fly Shop trips: first, we continue to have a number of openings for the 4/13 and 4/14 Fly Shop trips on the Sacramento. Last year we absolutely hammered them on these outings and would hope for the same again this time around. The second matter relates to Steiner and its top water bass to 6 pounds. We have a max of six for the May 19 trip and already have five signed up. Members interested in either should contact me ASAP at ccb819@sbcglobal.net.

While not exactly why this column surfaced, this seems to be a good place to report on the Amador trip. The breakfast was perhaps the day's high point with the grease flowing freely and the portions generous to obscene. After that we did go fishing. Results varied, but most of the fish were 17-20 inches. A new tactic showed up which is to fish virtually on the shore about 3 feet under an indicator with #14 Copper Johns, etc. This method clearly was the most effective one on this day.

Finally, let me digress to discuss a matter clearly not contemplated in this column, a non pay-to-play trip: namely Pyramid. So far the fishing this year has been, putting it in nice terms, terrible. Absent an improvement Jon Knapp tells me the Club outing will be cancelled. Should that occur and the reservoir levels favorable, we will substitute an Iron Canyon trip. It has been some time since we went there, but if conditions are right members can look to double digit days with fish running from 12" to 21". We will have an update on this in the March newsletter or at the March meeting.

Attention Fly Fishers of Davis!

We are proud to announce the finest, most exciting item ever to be auctioned off at our annual dinner.

ORVIS

Helios 10' 4 wt* and Mirage LA II Reel Complete Outfit

Retail value is over \$1300.00, and bidding will start at \$400.00

If you've ever wanted to own the very finest, ultimate nymphing rod — then your opportunity is almost at hand. Whether you're interested in any style of nymphing or simply casting dries, this remarkable combo could be yours! Plan now, club-members, and raid the cookie jar if you have to. We'll see you at the dinner!

Stay tuned for more news soon about additional exciting items!

**The 10-foot rod offers an extra foot of reach for precise nymphing or greater mending capability with dries. In highly technical waters where the fish are picky and presentations need to be precise and absolute, the Helios 104-4 stands out as the best line control rod ever designed. The 10-foot rod is also the weapon of choice for float tubers and pontoon anglers, providing the extra length to keep the back cast up off the water. If you're looking for a rod to give you that extra edge, the Helios 104-4 offers the lightest most powerful rod in its class. It is a specialty rod, but one that is proving more and more popular with anglers looking for that little something extra in presentation.*

CONSERVATION UPDATE

By Lowell Ashbaugh

Conservation Mailing List Want to keep up on conservation issues between newsletters? Join the FFD Conservation email list at

<http://www2.dcn.org/mailman/listinfo/ffd-conservation>.

Delta Striper Win We had a big win on the proposed Striped Bass regulation change this month (see the November 2011 newsletter for details). Several hundred people attended the Fish and Game Commission meeting on February 2, and nearly everyone who spoke was opposed to the change. The only people who spoke in favor were those who were paid by the water contractors to support their cause.

I delivered the 70 postcards signed by our club members the day before and briefly spoke to the commission. After all the public testimony was given, each commissioner had something to say. Ultimately, they voted unanimously to reject the proposed change!

Save the Date The third Trinity River Restoration Program Science Symposium will be held in Weaverville, California, during the week of January 7, 2013. The event will be a forum for strategic planning for the Trinity River based on the outcomes of the Phase I Review and other timely results from 2012 studies. The symposium will serve as a foundation for improving the quality of future management decisions based on up-to-date scientific findings. More detailed information on the symposium will be shared in the coming months.

California water bill in the works Republican lawmakers, led by Rep. Tom McClintock, R-Elk Grove, have been quietly overseeing the rewrite of a huge California water bill since last summer. The bill could shape everything from the San Joaquin River to Sacramento Valley water deliveries.

This bill will be a follow-up to the HR 1837 legislation that Nunes and others in the Valley put forward last June. That bill had significant pushback from valley and Foothill water districts as it over-rode area of origin water rights, and usurped state water rights. It also had lots of over-rides on the Endangered Species Act section 7 Biological Opinions for Delta Smelt and Salmon/Steelhead, as well as blocking the San Joaquin River settlement. It was a bad bill then, and is likely to be a bad bill again for the Delta and fishery.

Sustainability Forum on Water and the Delta For the first time, proponents and opponents of the State's plans to transform the San Joaquin-Sacramento Delta will discuss the merits and drawbacks of the Delta Plan and the peripheral canal. The forum is scheduled Saturday, March 3, 2012 at the Civic Auditorium in Stockton, and is open to the general public.

The purpose of this forum is to inform and explain to all residents in the Delta region the scope and impact of changes that may forever alter the unique features of the Delta by redefining the character and future growth of communities that lie within the region, by eliminating family farms operating within the Delta, and by altering the fabric of life enjoyed by Delta residents.

"**A Primer on Water and the Delta**" is the first of three forums that are being hosted by the same coalition of environmental advocates, private business and local government that held community forums the past two years on how to employ sustainable practices in everyday life. Members of the coalition are the Sierra Club, Campaign for Common Ground, the A.G. Spanos Companies, the Stockton City Council and the San Joaquin Council of Governments.

"Water is vital to our local economy, our farms, and our cities. As residents of the region and stewards of this unique estuary and habitat to many species, it is important that we stay informed and alert to insure that we retain local control over our water and our future," said Susan Eggman City Council Member.

Presentations at the forum will be made by Dr. Jerry Meral, Deputy Secretary for the California Natural Resources Agency; Jason Peltier, Chief Deputy General Manager, Westlands Water District; Jim Fiedler, Chief Operating Officer, Santa Clara Valley Water District; Ann Johnston, Mayor of Stockton and Chair for the Delta Coalition; John Herrick, an expert on local water issues; Jeff Michael, Director of the Business Forecasting Center, University of the Pacific; and Barbara Barrigan-Parilla, Executive Director of Restore the Delta.

The forum will begin at 8:30 a.m. and conclude at 12:00 noon. Each presentation will be followed by a question and answer period. Moderator for the entire series will be Susan Eggman, a City Council Member of the City of Stockton and Professor of Social Work at the California State University at Sacramento.

Members of the organizing committee are Dale Stocking, Sierra Club; Eric Parfrey, Campaign for Common Ground; Councilwoman Susan Eggman, Stockton City Council; Natalia Orfanos, A.G. Spanos Companies; and Andrew Chesley, Executive Director of the San Joaquin Council of Governments.

Sierra Trout Camp Trout Unlimited of California is holding its first Sierra Trout Camp for middle school-age boys and girls on June 15-17, 2012 at the UC Berkeley Sagehen Creek Field Station located just 10 miles north of Truckee, CA.

This is the most accessible and technical youth fly fishing camp in California, giving students an experience in fly tying and fly fishing, and starting their journey to a lifetime of outdoor pursuits. Sierra Trout Camp is designed to give kids an awareness, appreciation and understanding of the importance of our nation's aquatic resources with an emphasis on conservation, protection and restoration of coldwater ecosystems. Participants will also learn about stream ecology, cutthroat trout restoration, stream physics and chemistry, fishing etiquette and aquatic entomology. They will also do some hiking and swimming.

The UC Berkeley Sagehen Creek Field Station is located on the banks of Sagehen Creek, a coldwater stream containing wild brook, brown and rainbow trout. Facilities include a dormitory, dining hall, classrooms, outdoor meeting shelters, and full-time professional staff.

Sierra Trout Camp 2012 will begin at noon on Friday, June 15, and end at 5 p.m. on Sunday, June 17. Girls and boys 9-14 years of age as of June 15 are eligible. Trout Unlimited will accept a total of 15 participants. Tuition is \$150, and insurance coverage is provided by UC Berkeley Sagehen Creek Field Station.

Youngsters interested in attending Sierra Trout Camp 2012 must complete an application form, available at http://www.tucalifornia.org/TUCA_CMS/.

Applications are now being accepted and must be submitted no later than April 1, 2012; selections will be made by April 22nd, 2012. Applications should be mailed or e-mailed or sent to David Lass; dlass@tu.org; 10356 Donner Pass Rd. STE B, Truckee, CA 96161.

When families are notified that their child has been selected, they will be provided with a UC Berkeley waiver and liability form that they must fill out and send back to Trout Unlimited.

From the NCCFFF ***By Cindy Charles***

Santa Clara Creek Mondy Lariz has been our representative in the Santa Clara County Environmental Coalition for Living Streams, working to get the Santa Clara Valley Water District to restore steelhead in the creek via FAHCE (Fisheries & Aquatic Habitat Collaborative Effort). Mondy has recently stepped down and the NCCFFF has accepted the pro bono offer by Richard McMurtry to represent it in continuing this work with me involved as time permits. Richard is retired from the Regional State Water Control Board and has been the Program Coordinator for several years with the Santa Clara Creeks Coalition. He has been involved in this project for many years.

Recently, with approvals, the Northern California Council Federation of Fly Fishers became a member of the Santa Clara County Environmental Coalition for Living Streams. The Coalition is the successor to the Santa Clara County Creeks Coalition. That Coalition was made up of NCCFFF, the Audubon Society and the Committee for Green Foothills. Two changes have occurred that require a new coalition to continue the advocacy efforts for streams begun by the Santa Clara County Creeks Coalition. One was the election of Brian Schmidt of the Committee for Green Foothills to the Board of the Santa Clara Valley Water District, thereby creating a potential conflict of interest between Brian's role with the Creeks Coalition Advocacy and his role with the Water District. Second was a decision of Audubon Society to focus its efforts on bird issues, rather than creeks issues. The Creeks Coalition is therefore scaling back its efforts and focusing on its annual creeks conference.

This is occurring at a critical time in the environmental community's ability to influence the Santa Clara Valley Water District's proposed \$430 million Special Tax for Water Supply, Flood Control and Wildlife Habitat. So we are undertaking to create a new Creeks Coalition to focus on getting the Water District to commit on the order of 35% of its tax measure to Stream Restoration with a focus on anadromous fish restoration and health of the watershed.

Thanks to Mondy for his years of tireless work on this important project!!

Hal Janson

*To be the 34th inductee into the
NCCFFF Fly Fishing Hall of Fame*

Hal Janssen is a nationally known writer, artist, lecturer, and video personality. He has been fly fishing for over 50 years in both fresh and saltwater for nearly every species of fish all over the globe. He was adopted by the Golden Gate Casting and Angling Club at a young age. They set him up with a "shooting head" and taught him how to cast. Growing up in the 50's Hal is one of the "Rivers of the Lost Coast" greats.

Hal is one of a few special people in the world with naturally polarized eyes. This allows him to see better and quickly analyze stream conditions therefore adding to his ability to perform as one of the great world class anglers.

Hal has made numerous contributions to the evolution of modern fly lines. Hal, along with Leon Martuch, has been responsible for developing Scientific Anglers wet-tip fly line. He and John

Agnew worked on the development of the first tapered lead core line and the invention of the density compensated uniform sink line. His list of accomplishments to the improved products used in our sport are too great to list here.

Today, Hal has over 70 fly patterns that are distributed worldwide. He has written numerous articles for leading fly fishing magazines. Produced several fly fishing videos and contributed to many books as both artist and author.

His accomplishments go on and on, too numerous to list here.

We look forward to hearing his comments on March 10, 2012 as Hal is inducted into the Northern California Council of the Federation of Fly Fishers Hall of Fame. Please join us for this exciting evening of recognition for one of the GREATS in our sport of fly fishing.

Book of the Month

By Jim Luschwitz

“Dave Whitlock’s Guide to Aquatic Trout Foods”

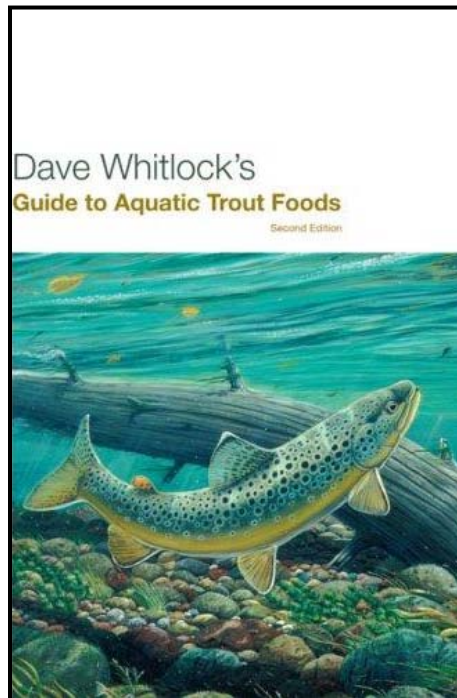

By Dave Whitlock

Let me say this right away: this is an outstanding book. Some may argue that it is not the best -- I wouldn't know, I haven't read them all. But it sure is a fine book.

For people who are fairly new to stream fishing and fly tying, this book puts a lot of stuff in its right place. We've all heard the words; spinner, emerger, caddises, mayflies and so on, but I'd bet that a lot of you never really could find your way in all these terms and their proper use and their fly counterparts.

If you not nearly sure about what to use or how to fish it at a certain stream under certain conditions. This book will fill some large holes.

The book is actually quite systematic. Dave Whitlock deals with all important fresh water trout food species; from mayflies, caddisflies and stoneflies to fish, scuds, shrimps and leeches. Every group is described in detail: life cycle, which is very important to understand - especially when it comes to insects, morphology, habitus and how to imitate them. Concerning imitations Dave Whitlock deals with the flies as well as tactics. This is a great advantage to people who can tie a stream fly from description, but only rarely know how to fish it.

The book starts out with a general overview of the concept of imitating followed by a chapter on 'water'. This again is followed by a large chapter on the morphology, physiology and life of the trout itself. This chapter can seem a bit intimidating, but skip it if you're not comfortable with the 'scientific stuff' and return to it later. The fly chapters are much more easlily read.

The patterns are all fairly simple and easy to tie. There's typically one pattern for each stage of each group of animals. Some flies are presented with two different patterns using different materials or techniques. All the drawing are a treat: nice to look at and very informative.

Also the book is printed on a large format paper, so there's lots of room for large and clear drawings.

My conclusion is: if you're new in this stream fishing game, get this book. It's a great source of systematic info on trout food. It contains a balanced text

on all important issues: feeding habits, life cycles, imitations and equipment and strategies. It's a highly usefull book, both for general reading and as a systematic handbook.

How to become a member of the Fly Fishers of Davis

Dues for adults and families are \$30/year. Student rate is \$15/year. The monthly newsletter is distributed by e-mail only. Please be sure to provide a valid e-mail address so that we can get the newsletter to you in Adobe Acrobat format. <p>Copyright 2010 All Rights Reserved. The Fisherman's Line is published by: The Fly Fishers of Davis P. O. Box 525 Davis, California, 95617</p> <p>The Fly Fishers of Davis (FFD) is a non-Profit 501.C.4 charitable organization dedicated to the education, participation, conservation and enhancement of fly fishing. Annual associate membership is \$25 beginning with each calendar year. FFD meets monthly except for the months of July & August. Regular monthly meetings are held the last Tuesday of each month except for December and February. December meetings are held the second Tuesday to accommodate holiday schedules. February hosts the Annual Dinner meeting which is scheduled in the latter part of the month based upon facility arrangements.</p> <p>FFD is an affiliate club of the Federation of Fly Fishers (FFF), an international nonprofit organization, and its Northern California Council (NCCFFF) affiliate.</p> <p>Meetings and membership are opened to the public.</p> <p>The Fly Fishers of Davis provide equal opportunity membership without discrimination on sex, race, origin, age or religious orientation.</p> <p>E-Newsletter Policy</p> <p>Our policy is to deliver the e-newsletter via email OR you may download it from the FFD website at: http://www.dcn.davis.ca.us/go/ffd/.</p> <p>Be sure if you signed up for the \$25 annual membership that you get your email address to John Reynolds at ireyn@dcn.org. This will assure that you get an email notification of the newsletter. Each month, except June & August the e-newsletter will be posted to the above site and emailed about 1 week before the meeting. You will need Acrobat Reader http://www.adobe.com/products/acrobat/readstep2.html to view the PDF format.</p> <p>Fishermen's Line is copyrighted by the Fly Fishers of Davis.</p>
